

## Open Internet Explorer

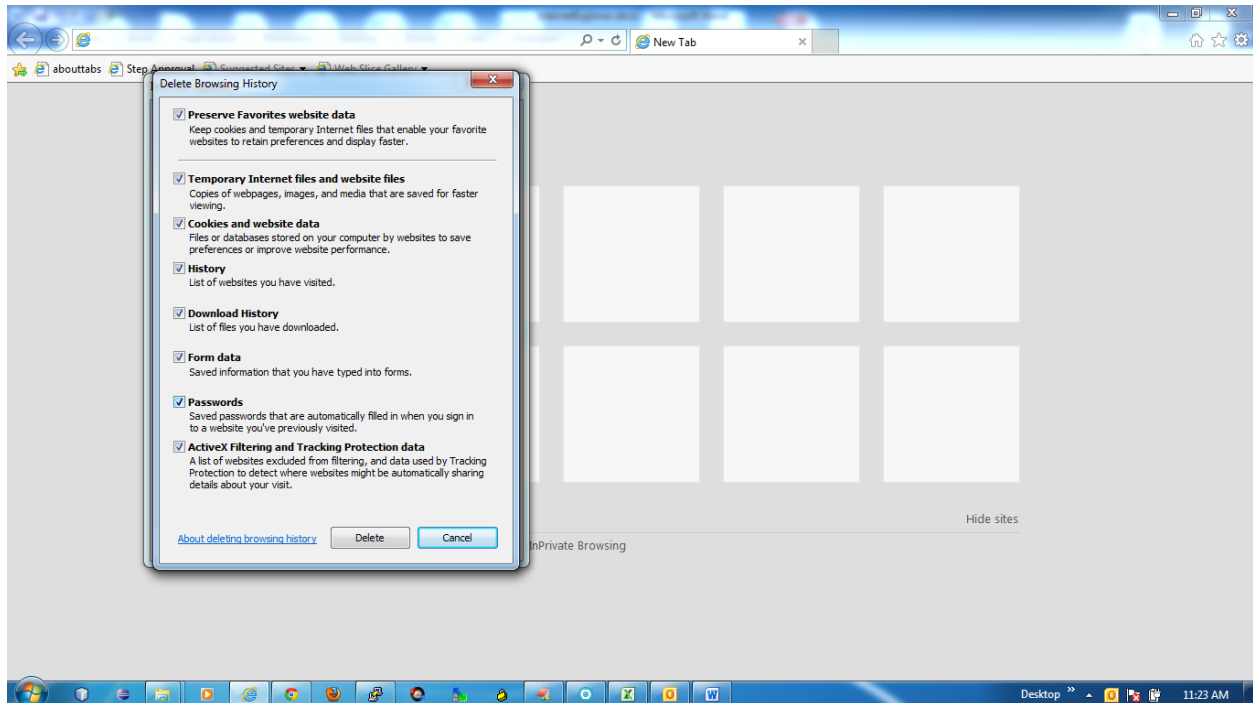

## Select Internet Options within the Tools tab

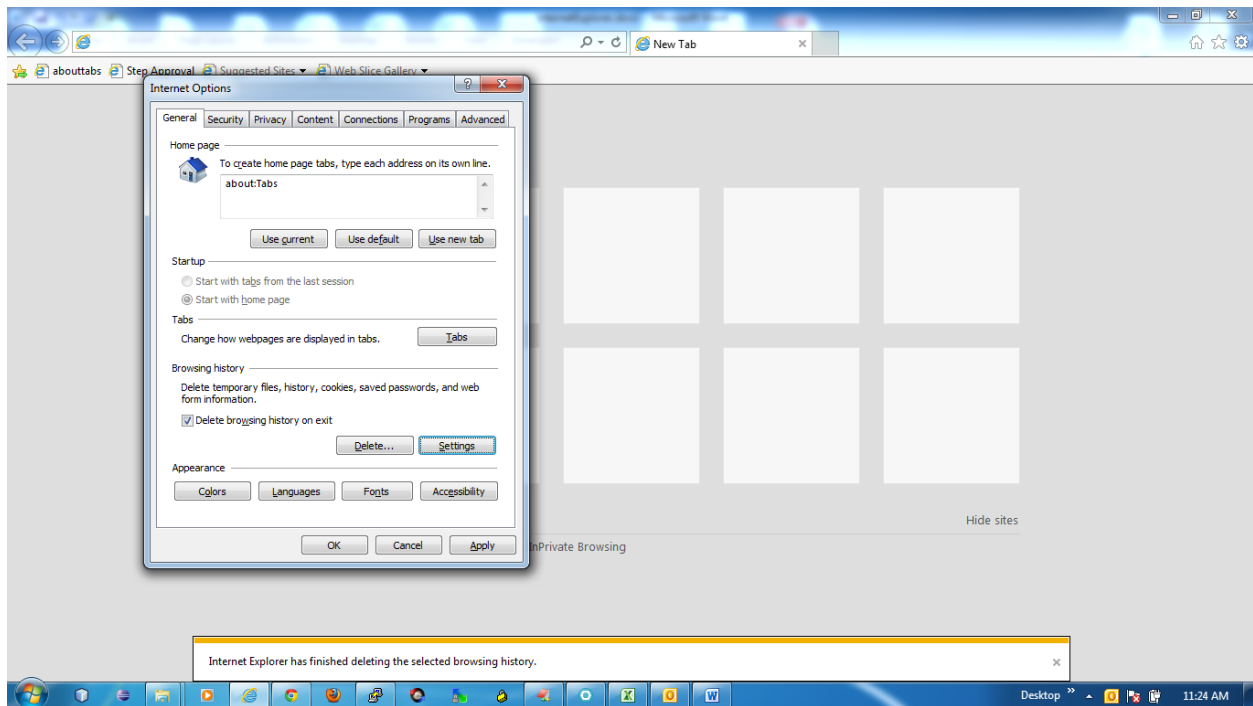

Under Browsing History, select the Delete button

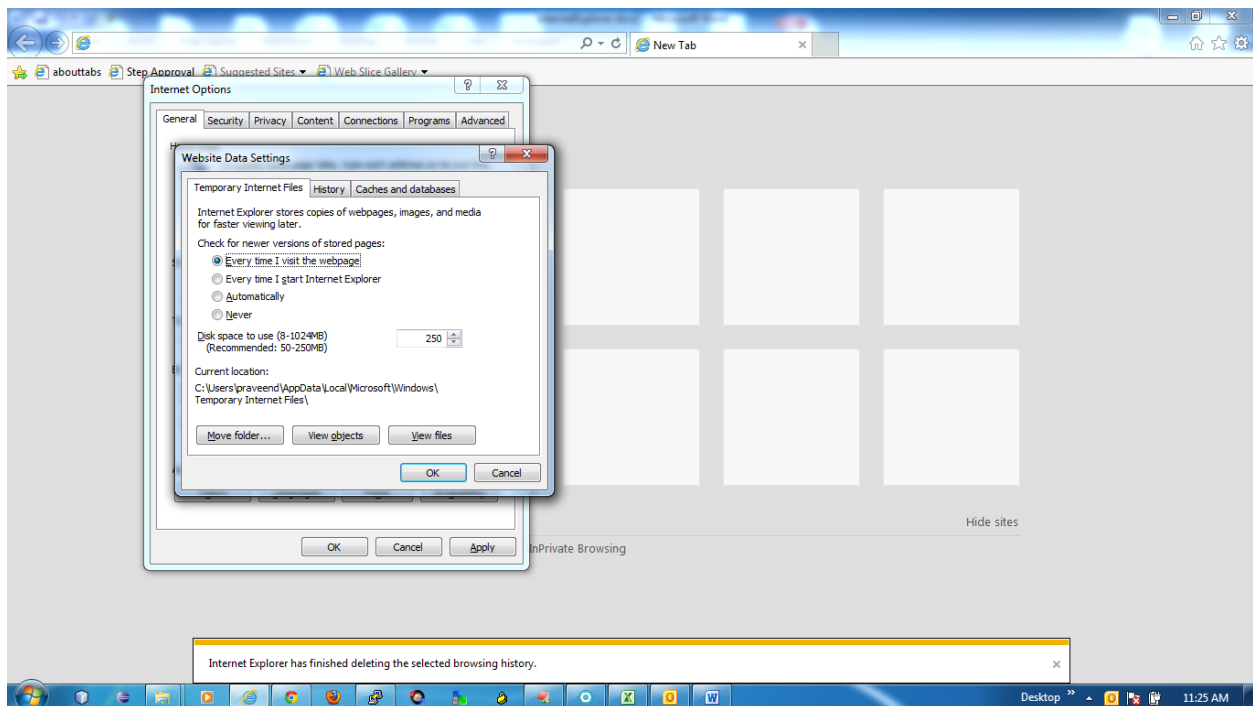

Select all the check boxes and select the Delete button

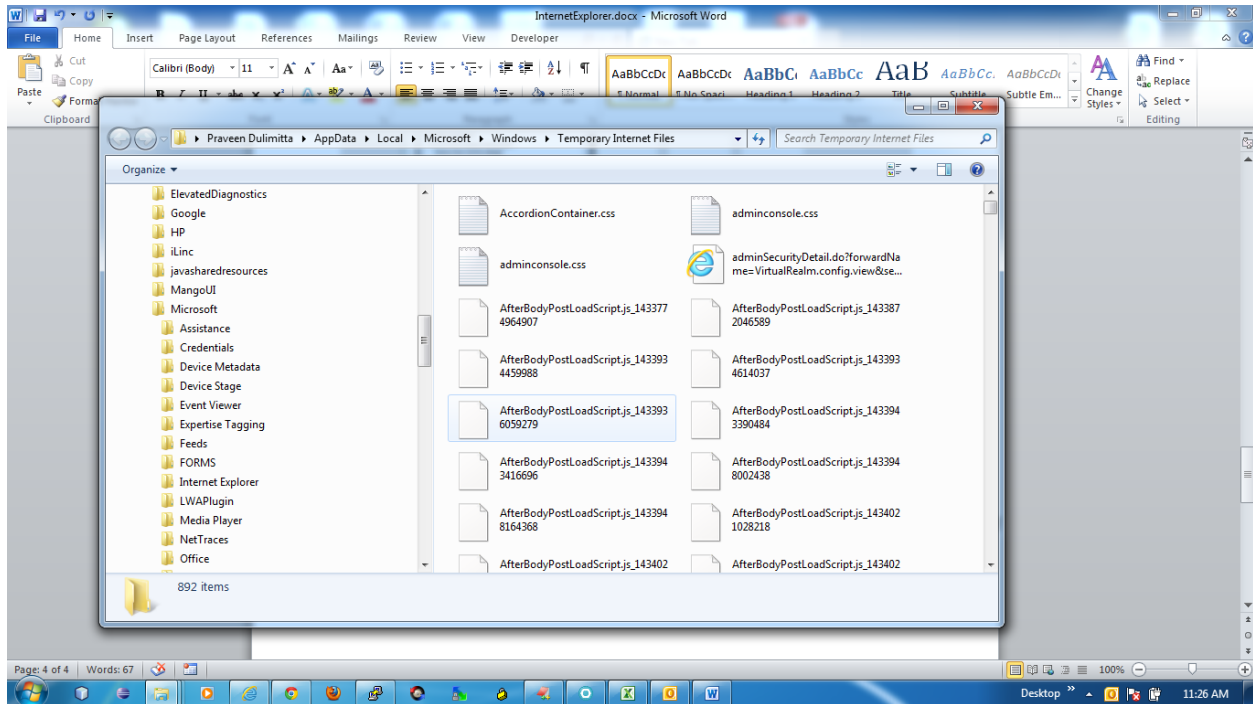

After Deleting the Browsing History, select Settings within Browsing History

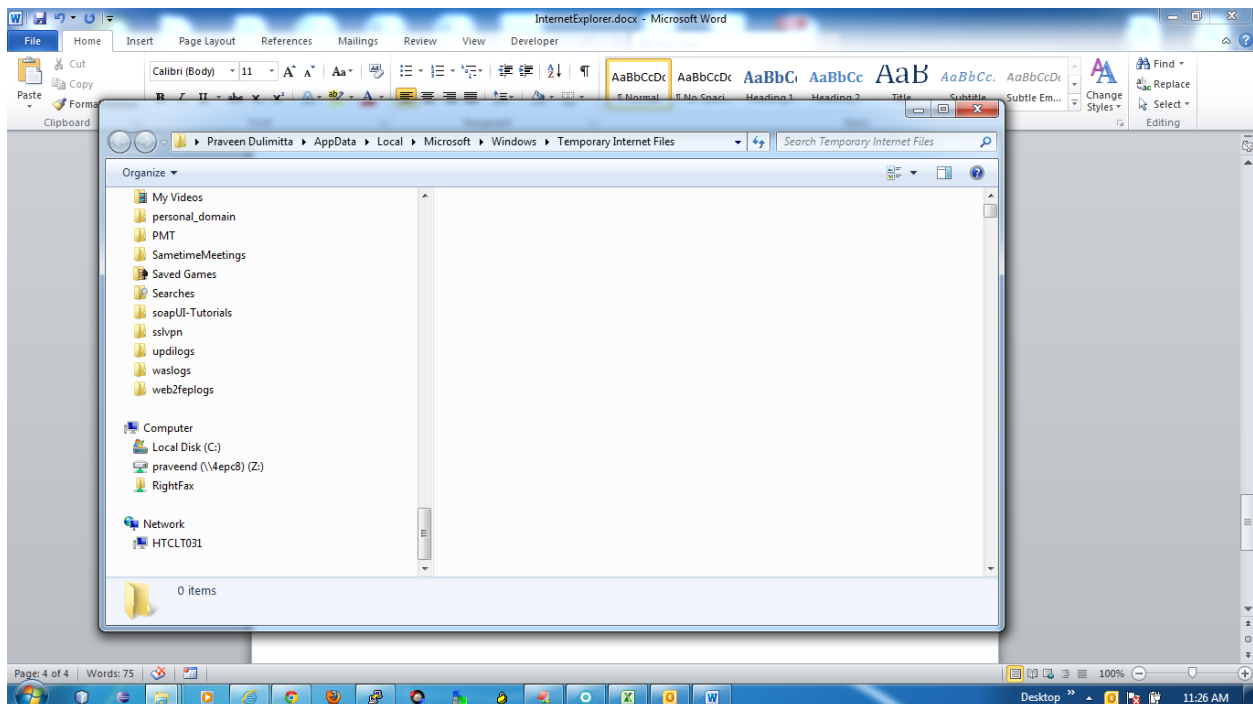

Select “Every time I visit the webpage”

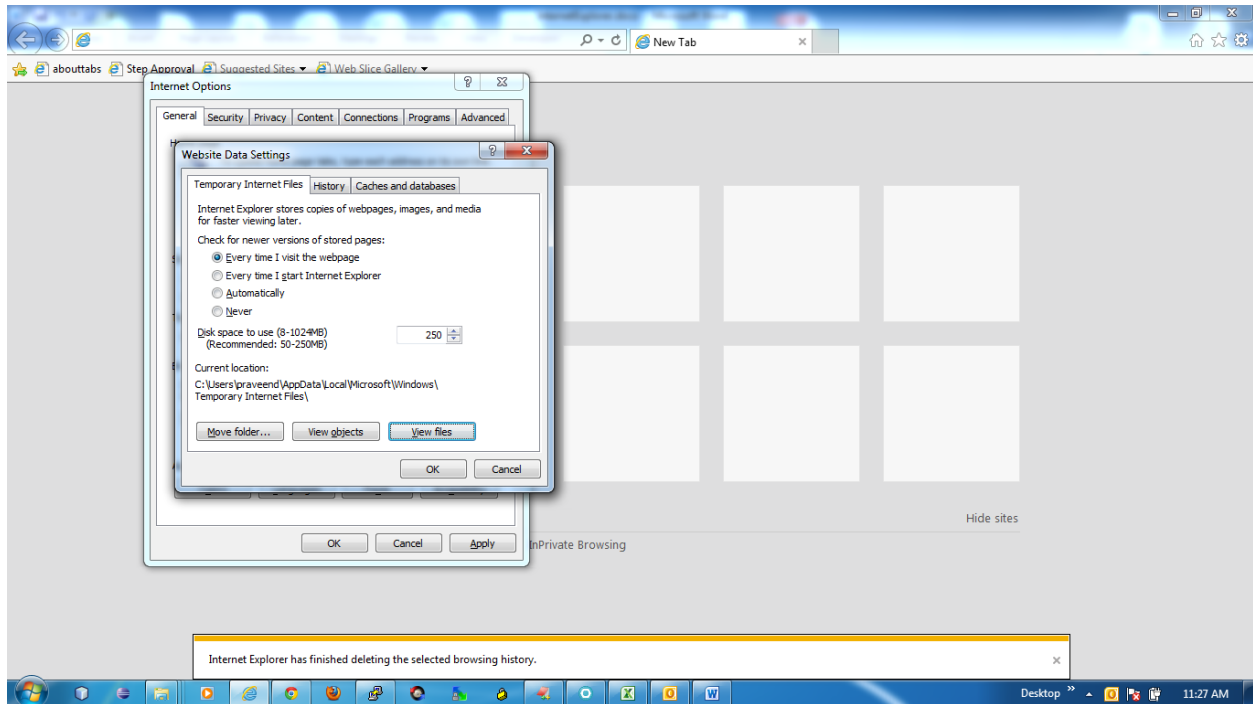

Select “View Files”. This will open a new window with all the temporary internet files

Delete all the files from the directory. You can close the window later.

Click on Ok and Ok.

Make sure the browser is in Compatibility mode.

You can start using the browser.
